OAK ORCHARD ACID SPRINGS.-These

OAK ORCHARD ACID SPRINGS.—There
Springs are situated in the valley of the Oak Orchard Creek,
in the town of Alabama, Genesce County, N. Y., eight miles
south of the village of Medlaa, on the Eric Canal, and fourteen
miles from Basavia.

The principal Acid Springs are three in number; beside these
there are six others. They are all located within a circuit of
about fifty rods. The medicinal qualities of the waters are folly
shown in the subjoined testimounists. They contain a very large
amount of Sulphur, Sulphuric Acid, Sulphate of Lime, and
Proto-Sulphate of Iron. The great medicinal virtues possessed
by the waters depend very largely upon the presence, in such
annexal quantities, of these corative substances.

Hundreds of cases of disease, especially those resulting from
the scroftslous disthesis, have been cured by their use.

In skin diseases—even in confirmed Leprosy—the waters have
been signally successful.

Ophdous of medical and scientific gentlemen are given in the
circulars. The following eminent gentlemen are given in the
circulars. The following eminent gentlemen speak in strong
terms of the medicinal value of these waters: Prof. Emmons,
T. Romespa Buck, M. D., of Albany: Jas. McNaaghton, M. D.,
of Albany: Edward Spring, M. D., of New-York, Dr. R. Campbell of Pittafield, Mas.; Dr. J. S. Shuler of Lockport, N. Y.
They recommend the waters confidently. Dr. Byring refers to a
case of Chronic Diarrhea of several verar' standing, which was
cared by the use of the vater. Dr. Beck says: "I am satisfied
that these waters are highly valuable as medicinal agents." Dr.
Campbell says: "They must be highly beneficial for all chronic
diseases of the stomach and bowels."

Dr. S. P. White reed a paper on the subject of these Waters
before the Academy of Physicians, in the City of New-York, in
which he states that the Waters possess decidedly tonic, refrigerant, and estringent properties and that the class of diseases
to which they are more particularly dapted, are chronic affections of the Directive and Urbar

to cases of salivation, and in Leucorrhees and Gleet; and also in Piles.

When taken internally, a wine-glassful of the Water, diluted, sken three times a day is unfilicient for an adult.

Other testimouslas from physicians, and other respectable individuals, may he seen on application to the Agent.

FROM BOSTON.

From Our Own Correspondent. BOSTON, June 15, 1860. The Legislature has adjourned, after a session of

means of paying the bills already incurred in the suppression of the cattle disease, and appropriated \$75,000 beside (\$100,000 in all), for future ex-\$75,000 beside (\$100,000 in all), for future expenses. The bills reported by the Committee were passed without material alteration. They are well drawn, and embody the best judgment of our people at present. By and by they may seem inadequate, or they may seem extravagant, but the legislators have done as well as they could, with the information before them, and acting as coolly as the popular feeling in the farming regions would let them. It was thought best to err on the side of over-action rather than on the side of inaction, and I believe we shall have the satisfaction of knowing that the people of the other States cannot reasonably find fault with us for not doing our duty. I have no idea that the pleuro-pneumonia which exists in New-Jersey, Pennsylvania, and some other States came from this State, and I think there is good reason to doubt whether it came from Europe into Mr. doubt whether it came from Europe into Mr. Chenery's herd at Belmont; but if we have spread it abroad, we have atoned as well as we could for it abread, we have atoned as well as we could for our fault. Massachusetts will not mind the expense, for these "extraordinary expenses," as they are called, have got to be quite common. In 1853-54 we had to pay nearly \$200,000 for an attempt to amend the Constitution; in 1854-55 as much more for enlarging the State House; in 1855-59 as much more for revising the statutes, and now we have got to pay one or two hundred thousand for the

leuro-pneumonia.

Our Democratic delegates are off to Baltimore. The Our Bemocratic designessire on to Baltimore. The popular men have been very busy trying to get up a popular indignation which should operate upon the delegates who went againt their favorite, but they have not succeeded. In the Berkshire District a Convention was held which passed some resolutions intended as an admonition to Mr. Carpenter of Greenfield, but I presume he will not pay any attention to them. Mr. Cavanagh of Minnesota, after speaking in Faneuil Hall, went up to Lowell to annihilate Gen. Butler, but came back with an uncomfortably large flea in his ear. The people not only would not let Butler be abused, but when Cavanagh attempted to speak disrespectfully of Charles Sumner, they hissed him down, and obliged him to leave that topic. The Douglas meeting in Faneuil Hall was a very large one, but the entertainment was not precisely what was expected. Reverdy Johnson's essay on Popular Sovereignty lasted nearly two hours, and was Greek, Choctaw, or something worse to the assembled Douglas mea, Convention was held which passed some resolutions

lasted nearly two hours, and was Greek, Choctaw, or something worse to the assembled Douglas mea, who were not, as a general thing, quite up to an understanding of the subtleties of the argument. When Mr. Johnson, having exhausted one pile of manuscript, pulled out another and proceeded to read, the ironical cries of "O, don't," and "Dry "up," were inexpressibly ludricous, but not more so than the speaker's occasional perplexity when he paused, looked round, and listened for the applanse which didn't come. The essay was printed in The Courier, but even the man who perused the Monikins, whom I am happy to rank among my personal friends, shrinks appalled from the task of reading it. I notice that Senator Mason of Virginia has de-

I notice that Senator Stason of Virginia has de-chied that Gen. Wilson is not a gentleman. This means I suppose that the General declines to fight duels, and pays his debts. The chief ingredient in the character of a gentleman, according to the slave-holders, is the chronic and inveterate habit of cheat-ing their laborary cut. of their more holders, is the chronic and inveterate habit of cheating their laborers out of their wages. Any man who does this, whether on a large scale like Senator Hammond, or in a small way like some poor shack who keeps a "nigger" for his own private walloping, is a gentleman. The essence of the thing is to get your work done without paying for it. There is another class of men who are admitted into gentlemanly society, though not quite up to the Southern standard. This is the class of volunteer slave-catchers and apologists for Slavery. They show their willingness to become

class of volunteer slave-catchers and apologists for Slavery. They show their willingness to become slaveholders when the local law does not forbid, and so the presumption is, that if they pay their laborers they do it because they are obliged to, and not because they believe in the principle. A curious instance of the deforence paid to this class of men occurred six years ago, when Riley, Butman, Coolidge & Co. visited Richmond for the purpose of returning Burns to his pretended owner. They were taken in hand by a committee of citizens, and a public dinner was given to them, at which the Mayor presided. The first families opened their parlors, and it would seem as if the virtuous Butman and chivalric Coolidge might have their choice among the wealthy beauties of the city if they had been disposed to make a matrimonial venture, or

been in a condition therefor. At Alexandria, similar hospitalities were offered.

To illustrate the manners of slaveholding Sonators, let me relate the substance of a conversation which occurred at Charleston during the sitting of the Democratic Convention, between one of the most distinguished of the delegates from this State and a Senator from the extreme South, who represented the Administration:

Good morning, Sir!

This ended the interview between the Northern

"mudsill" and the South-western "gentleman."

The Legislature passed a series of resolutions fully approving of Mr. Sumner's speech, and adding a word of commendation of Gen. Wilson. So we are all in the same boat, and if Wilson and Sumner and Sumner and Summer are not gentlemen, we are none of us in that "cat are not gentlemen, we are none of us in that "cacegory," always excepting, of course, Mr. Everett,

The National Quarantine and Sanitary Convention is in session here, apparently bent upon having a good time. The proceedings thus far have been unimportant. One of your New-York doctors informed the Convention that arsenic is not near so poisonous as it is supposed to be. This accounts for the preference given to strychnine in the best projecting elizabes.

The Atlantic Monthly for July has the first part of an historical sketch by John P. COURT OF GENERAL SESSIONS—JUNE 16—Before Recorder BARNARD.

The case of Samuel Kinnelstein, baker, whose trial on the charge of receiving 600 barrels of flour stolen from Hecker Brothers, the wholesale bakers, opened yesterday, was continued before this Court to-day. Many witnesses were examined, as is always the case in trials for receiving stolen goods, and the trial was tedious and unduteresting.

The Court adjourned without finishing the trial.

The Thinnyn of Thursday, 14th inst, contained a statement that Adrian Mairet was tried and convicted of receiving stolen goods. This is incorrect. The jury did not convict Adrian Majorit, but found him not guilty.
